

SUPPORTS ALL NINE CALL OF DUTY - BLACK OPS BUTTON LAYOUTS

Do you use a non-standard layout in Call of Duty, only to find out that your mod isn't compatible?

This mod supports all nine button layouts. Hold down the tac switch, then hold triangle to change the button layout.

Player 4 LED will blink slowly to indicate which button layout you have selected.

The mod adjusts to your button layout, without the need for any complicated remapping.

<u>Hold Triangle Button</u>	<u>To Change Button Layouts:</u>
Layout 1:	Default
Layout 2:	Tactical
Layout 3:	Lefty
Layout 4:	Nom4d*
Layout 5:	Nom4d Tactical (Charlie)*
Layout 6:	Default Alt
Layout 7:	Tactical Flipped
Layout 8:	Lefty Flipped
Layout 9:	Nom4d Flipped*
Layout 10:	Nom4d Tac Flip*

*Limited mod support in Nom4d layouts

SUPER-FAST RAPIDFIRE GROUP SWITCHING:

Tired of waiting for the LED to blink through all those numbers to start shooting?

This mod uses super-fast switching between the different rapidfires.

Hold down the tac switch, then tap any one of the following buttons to switch to that rapidfire.

The mod switches rapidfire group immediately, and the Player 4 LED flashes quickly to acknowledge.

When any rapidfire mode is enabled, Player 4 LED stays illuminated.

<u>Press This Button</u>	<u>To Change to This Rapidfire Group</u>	<u>What does this rapidfire group do for me?</u>
Fire Weapon	Single-trigger rapidfire	Turns single-fire guns into full-auto guns
ADS (Scope)	Dual-trigger rapidfire	Turns single-fire guns into full-auto guns
Throw Tactical	Zombie auto-aim	Enables auto-aim when in Zombie arcade mode
D-Pad Up	Jitter rapidfire	Increase the firing rate of most guns (patched in MW3)
D-Pad Left	Akimbo rapidfire	Unload your semi-auto Akimbo pistols in the blink of an eye
D-Pad Right	Burst rapidfire	Fires most guns with 2, 3, 4 or 5-round bursts
D-Pad Down	All rapidfire turns off	Quickly turns off all rapidfire!

SUPER-FAST SPECIAL FEATURE TOGGLING:

Tired of not being able to toggle your special features on/off quickly in the heat of the action?

This mod supports super-fast toggling of the special features.

Hold down the tac switch, then tap any one of the following buttons to toggle that feature on or off.

The mod toggles that special mode on/off immediately, and the Player 3 LED flashes quickly to acknowledge.

When any special mode is enabled, Player 3 LED stays illuminated.

<u>Press This Button</u>	<u>To Toggle This Special Mode</u>	<u>What does this special mode do for me?</u>
Melee Attack	Quick Scope	Tap your ADS button to shoot a single quickscope
Hold Breath	Sniper breath	When scoping, holds your breath automatically
Reload	Fast reload	Reload your gun faster (patched in MW3)
Crouch/Prone	Dropshot	Drop the ground when you fire your weapon
Throw Lethal	Turbo Melee	Knife faster than usual (requires Semtex)
Jump (X)	All special modes turn off	Quickly turns off all special features!

CHANGING MODES WITHIN EACH GROUP

In addition to super-fast rapidfire switching and special feature toggling, the rapidfire groups and special features can be customized.

Hold down the tac switch, then hold down any one of the following buttons to customize your mod.

Player 4 LED will blink slowly to indicate which mode you are changing to.

The modchip will always remember your selections, even when you power off your controller.

<u>Hold Fire Weapon Button</u>	<u>To Scroll Through Rapidfire Speeds:</u>
Mode 1:	Modern Warfare 3 - All other pistols
Mode 2:	Modern Warfare 3 - MK14
Mode 3:	Modern Warfare 3 - P99 and Five-Seven
Mode 4:	Black Ops
Mode 5:	MW2
Mode 6:	MW2 w/doubletap
Mode 7:	Halo Series
Mode 8:	GTA 4
Mode 9:	Gears of War Series
Mode 10:	World at War*

*Special mode only for use with World at War

<u>Hold Throw Tactical</u>	<u>To Change Zombie Modes Available:</u>
Mode 1:	Zombie auto-aim, no rapidfire
Mode 2:	Zombie auto-aim, plus rapidfire
<u>Hold D-Pad Up</u>	<u>To Change Jitter Modes:</u>
Mode 1:	Jitter YY stays on always
Mode 2:	When scoped, Jitter YY turns off
Mode 3:	Jitter XYY stays on always
Mode 4:	When scoped, Jitter XYY turns off
<u>Hold D-Pad Left</u>	<u>To Change Akimbo Modes Available:</u>
Mode 1:	When scoped, rapidfire is right-side only
Mode 2:	When scoped, akimbo mode turns off
Mode 3:	Akimbo stays on always
<u>Hold D-Pad Right</u>	<u>To Change Burst Firing Rate</u>
Mode 2:	2-round burst
Mode 3:	3-round burst
Mode 4:	4-round burst
Mode 5:	5-round burst
<u>Hold Reload</u>	<u>To switch the Fast Reload timing:</u>
Mode 1:	Gun 1 - Timing 33
Mode 2:	Gun 2 - Timing 34
Mode 3:	Gun 3 - Timing 36
Mode 4:	Gun 4 - Timing 42
Mode 5:	Gun 5 - Timing 53
Mode 6:	Gun 6 - Timing 54
Mode 7:	Gun 7 - Timing 56
Mode 8:	Gun 8 - Timing 63
Mode 9:	Gun 9 - Timing 213
Mode 10:	Gun 10 - Timing 214

CUSTOM RAPIDFIRE SPEED PROGRAMMING

Don't like the ten pre-tuned speeds we've provided? Create-your-own!

Reprogram your rapidfire mode to any speed from 5 shots-per-second up to 99 shots-per-second.

Rapidfire speed is programmed by individually setting the tens digit, the ones digit, and the decimal digit.

For example, if the speed is 16.2 shots per second. "1" is the tens digit, "6" is the ones digit, and "2" is the decimal digit.

Any time an LED or LED's flash very quickly, this means one of your numbers is set to "0". Otherwise it will slowly blink the number.

When in rapidfire speed programming mode, hold L1 to decrease speed, R1 to increase speed, or tap the tac switch to save the setting.

To enter into rapidfire speed programming mode, hold tac switch, left bumper, right bumper, then pull the right trigger.

The controller will let you know that it has entered programming mode by alternating the Player 3 and 4 LED's a few times.

The controller will then flash the tens digit to you on the Player 4 LED. Adjust the speed and then tap the tac switch.

The controller will then flash the ones digit to you on the Player 3 LED. Adjust the speed and then tap the tac switch.

The controller will then flash the decimal digit to you on the Player 3 and Player 4 LEDs. Adjust the speed and then tap the tac switch.

The controller will let you know that it saved your new speed by alternating the Player 3 and 4 LED's a few times.

CUSTOM FAST RELOAD SPEED PROGRAMMING

Don't like the pre-tuned fast reload guns we've provided? Create-your-own!

Reprogram your fast reload delay to work with virtually any gun in the Call of Duty series. Refer to the fast reload table on the website.

Fast reload delays are programmed by individually setting the hundreds digit, the tens digit, and the ones digit.

For example, if the reload delay is 105 units, "1" is the hundreds digit, "0" is the tens digit, and "5" is the ones digit.

Any time an LED or LED's flash very quickly, this means one of your numbers is set to "0". Otherwise it will slowly blink the number.

When in rapidfire speed programming mode, hold L1 to decrease speed, R1 to increase speed, or tap the tac switch to save the setting.

To enter into rapidfire speed programming mode, hold tac switch, left bumper, right bumper, then tap the Square [] button.

The controller will let you know that it has entered programming mode by alternating the Player 3 and 4 LED's a few times.

The controller will then flash the hundreds digit to you on the Player 3 and Player 4 LEDs. Adjust the speed and then tap the tac switch.

The controller will then flash the tens digit to you on the Player 4 LED. Adjust the speed and then tap the tac switch.

The controller will then flash the ones digit to you on the Player 3 LED. Adjust the speed and then tap the tac switch.

The controller will let you know that it saved your new speed by alternating the Player 3 and 4 LED's a few times.
